

SQL Project on

PIZZA SALES

ABOUT THIS PROJECT

Hello, My name is Priyanshu Patel. This project analyzes a pizza sales dataset using SQL to extract meaningful business insights. The dataset consists of four related tables: Orders, Order Details, Pizzas, and Pizza Types. The analysis focuses on answering business questions related to sales performance, customer ordering behavior, revenue generation, and product popularity by using SQL concepts such as Joins, Aggregate Functions, GROUP BY, ORDER BY, Subqueries, and Window Functions.

PIZZA SALES - DATA MODEL

```
SELECT  
    COUNT(*) AS total_orders  
FROM orders;
